

JOHN NEGLEY'S CHARITY OF CHOICE FOR HIS CAMPAIGN AS HONORARY MAYOR OF WESLEY CHAPEL, FLORIDA HOSPITAL WESLEY CHAPEL FOUNDATION.

John began his career as a teacher before entering the construction field and opening his own business doing projects in Pennsylvania, Maryland, West Virginia, Virginia, New Jersey, and Florida. In 1992, John made a move to join the Adventist Health System where he has been responsible for overseeing the building of 100s of Millions of dollars of health care facilities and capital improvements. Currently, John is responsible for the Florida Hospital Wesley Chapel project due to open early Fall of 2012 and has just started renovations on nearby University Community Hospital.

Outside of his career obligations, John has a very active lifestyle and loves to travel, fly, and spends time mountain climbing with his four grandsons. In fact, John has climbed Mt. Whitney, the tallest mountain within the contiguous United States, twice with his son and 10 year old grandson. His climbing travails have also taken him to mountains in Switzerland and Japan.

John also has a passion for giving back to the community and is the immediate past President for the Rotary Club of Wesley Chapel which he developed into one of the fastest growing clubs in the District. In addition, he has served on the board of Salvation Army, Habitat for Humanity, East Pasco Adventist Academy, and the Wesley Chapel Chamber.

This candidate for "Honorary Mayor of Wesley Chapel" has selected as his charity of choice, **Florida Hospital Wesley Chapel Foundation.**

The Foundation is a 501 (c) (3) and the fund raising arm of the hospital. Guided by our mission, we go beyond the traditional healing and believe in healing the whole person-**body, mind, and spirit.** Contributions given to the Foundation enable us to further our faith-based mission of healthcare in many ways. These include ensuring we have cutting edge technology and community health programs. We believe in embracing the best available technology and plan to have unique technology that enhances a patient's experience at the hospital.

Our "wellness center" located within the adjacent medical office building on our campus will be the home for many community outreach programs. For example, we plan to offer classes such as healthy cooking for diabetes control, nutrition for children and teens, and physical fitness for all ages. Our goal is to educate the community so that they know what they need to do to stay healthy.

As the hospital matures and the Foundation grows, we will continue with our mission and use our Foundation dollars to provide the community with what they need to stay healthy and thrive.
